Windows Display Properties Settings should be 96 dpi (Windows default).
Browser Text Size should be Medium.
* **Internet Explorer 9** supported when used in Compatibility Mode http://windows.microsoft.com/en-US/internet-explorer/use-compatibility-view#ie=ie-9

Category Definitions

The CheckFree RXP product is tested at varying levels using different browser/OS combinations. The level of testing determines the support category to which the browser/OS combination is assigned. There are 4 browser/OS categories:

- ***Supported*** – All functionality of the product has been tested and successfully meets functional and design requirements.
- ***Allowed*** – All major functionality of the product has been tested and successfully meets functional requirements. Some design deficiencies may occur.
- ***Blocked*** –This browser has known issues with CSP product(s) and possibly with other web sites as well. A notification splash page will be displayed advising the user that browsers in this category cannot be used with the application and provides the user with a list of appropriate browsers. Access to the application will be denied.
- ***Unsupported*** – Browser/OS combinations not specified in one of the other categories default to Unsupported. The product has not been tested with unsupported browser/OS combinations. Browser/OS combinations in this category are not widely used as determined by usage statistics for the browsers.
